LiftMotive LM-3500FR Full Rise Portable Scissor lift.

The LiftMotive LM-3500FR Full Rise Scissor Lift is the perfect above ground lift for professional garages. A space saver combining an extremely low lift platform height and a 1.90m full rise scissor lift system.

Features

HMSS – Hydro Mechanical Safety System

This system provides hydraulic locking and safety in one integrated design, eliminating the need to raise the lift slightly before lowering.

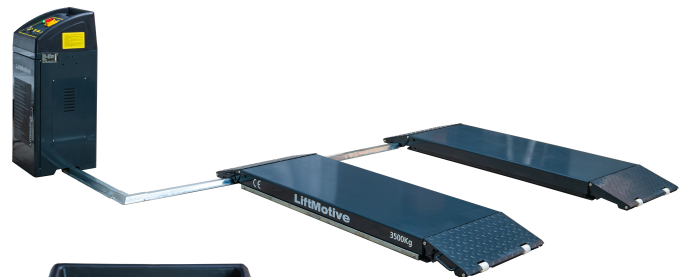

Easy To Use

The separate control panel can be conveniently positioned to allow easy access for the operator.

Lockable Ramps

Ramps are lockable at full extension. This means the maximum lift point spread is adjustable for short and long wheelbased cars.

- Total platform length of 2042mm
- Master-slave system, hydraulic synchronization
- Electric Hydraulic Double Trans Pump
- Equipped with four hydraulic cylinders
- Automatic venting function
- Photocell for safety and platform synchronization
- Low minimum lift height of 110mm
- Automatic synchronization by means of electric solenoid valves
- Automatic overload protection
- Control valve for controlling the speed when descending
- Limit sensors for limiting the maximum lift height and the minimum safety height
- Dead man's operation when lifting and lowering
- Foot protection incl. acoustic safety signal

Set of 8 Rubber Lift Pads

8 rubber blocks with 25&65mm height included
